

**NEW PROGRAM ANNOUNCEMENT** from Thomas B. Woods, PO Box 64, Jefferson, NH 03583  
Phone (603) 586-7734

**NEW FOR THE  
TS2068!!**

**A DATABASE**

**HIGH CAPACITY  
and EFFICIENT**

**VERSATILE**

**FAST**

**EASY TO USE**

**UNMATCHED  
PRINTER  
FUNCTIONS**

**ORDERED  
FILE OUTPUT**

**AVAILABLE NOW**

**FREE BOOK  
COMING SOON**

**PRO/FILE 2068:** a fast versatile and efficient information storage and retrieval tool for the Timex 2068.

PRO/FILE 2068 lets you manage information with your TS2068. You can use it for logging personal memos, scheduling appointments, compiling statistics, cataloging inventories, indexing abstracts, recording research data, managing a mailing list, and much much more.

PRO/FILE 2068 lets you store "files" or "screens" of data that contain anything you want. Actual file length is not preset. The program has a total capacity of 28,000 characters. Each file only takes up as much space as the characters used in the file plus a few "overhead" bytes to help the program run.

After data is added to PRO/FILE 2068, access to the files is provided by means of a "relational linear search". In English, this means you type in a word, symbol, or phrase that you know is in the file you want. The program then displays every file that holds the matching word. Finding files on the basis of just one word is really just scratching the surface of PRO/FILE's capabilities, however. With this program, you can scan your files for as many words as you like. You have a total of 32 characters in which to input your "search command". That command can be just one or as many as 16 separate and distinct words.

As with PRO/FILE 2068's predecessor, ZX Pro/File, search time is fast. Actual time, naturally, depends on what it is you're looking for and what data you have stored in the program, but typically, you can get the file you want on the screen in a second or less.

ADDING or EDITing files to PRO/FILE 2068 is simple. The program incorporates a totally flexible cursor driven text editor with many word processing commands. You can type across the 32 column screen. Special function keys move the cursor up, down, left, or right; insert text, replace text, erase segments of a line, delete lines, insert lines, and carriage return.

PRO/FILE 2068 can print out any individual file or any group of files. You specify just how the printing is to be arranged too. The PRINT FORMAT can be as simple or as complex as you wish. You could, for example, use the "ALL" command to print the entire file, or you could tell the computer to print lines 1, 2, 3; skip a few spaces; print line 7, 5, and 2; and repeat.

The display of files can be arranged alphabetically. You specify which line of a file shall be used as the basis for ordering and PRO/FILE does the rest. Both numbers and letters can be ordered, and combined with the program's definable print capability, you can manipulate your files in some very unusual and interesting ways.

**PRICE** for PRO/FILE 2068 is \$29.95

This includes a cassette of the program and operating instructions. A 100 page manual describing the programming theory, tips on how to customize the program, and loads of ideas for using it is in the works and will be available FREE to all who purchase the program. Expected completion date is late June or early July 1984. TO ORDER: send US funds VISA or MC information to:
